

PETERS VILLAGE THE MASTERPLAN

Originally home to the Peters Lime and Cement works, the Peters Village site is today reborn as a modern, well connected village and home to a community that will inject a new sense of vitality into this appealing corner of rural Kent.

Rising gently from its western boundary on the banks of the River Medway, to encompass stunning and extensive views over the Medway Valley, the village will provide 1,000 new homes across 210 acres, when complete. With a range of amenities incorporated into the development, new residents will essentially land in a ready-made, contemporary village community.
